Test remarks

- 1.All test data is referenced to 25 $^{\circ}$ C ambient.
- 2.Test Condition:1MHz, 1.0Vrms.
- 3.Irms:DC current (A) that will cause an approximate T of 40
- 4.Isat:DC current (A) that will cause L0 to drop approximately 30%.
- 5. Operating Temperature Range -55 to + 125 .
- 6.The part temperature (ambient + temp rise) should not exceed 125 under the worst case operating conditions. Circuit design, component placement, PCB trace size and thickness, airflow and other cooling provision all affect the part temperature. Part temperature should be verified in the end application.
- 7. The rated current as listed is either the saturation current or the heating current depending on which value is lower.
- 8. Absolute maximum voltage 15 VDC.

XStorage Conditions

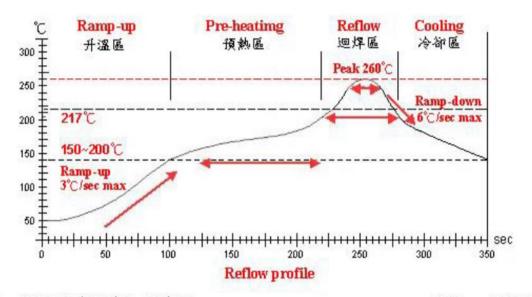

- 1. Temperature and humidity conditions: -10-+40 $^{\circ}\mathrm{C}$ and 70% RH.
- Recommended products should be used within 12 months form the time of delivery.
- 3. The packaging material should be kept where no chlorine or sulfur exists in the air.

Recommended Soldering Conditions

For Lead-Free Application

Figure . Re-flow Soldering

Lead-Free(LF) 標準溫度分析範圍

Refer to J-STD-020C
